EMBROIDERY

Use the Pictogram Pen to mark where on the towel you want to embroider the monogram (towel shown in photo has the monogram in the lower left corner).

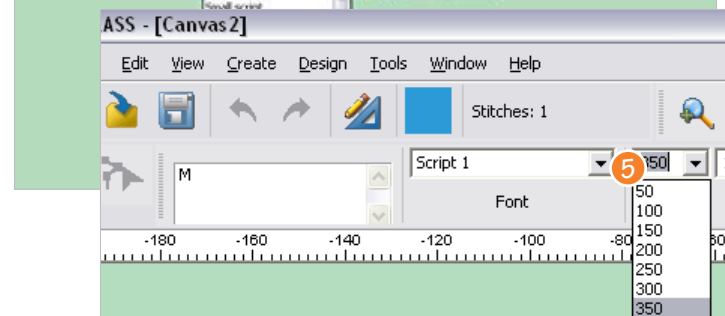

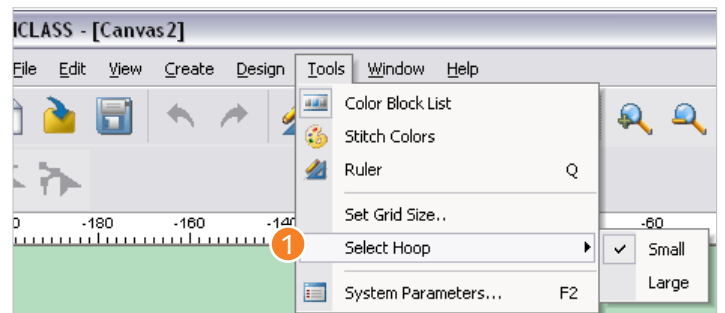

Prepare your machine for embroidery and connect to your PC. For more information see your H | CLASS™ 500E Quick Start Guide or the User's Guide (page 41-42).

Create the Embroidery Design

Open your H | CLASS™ 500E Software.

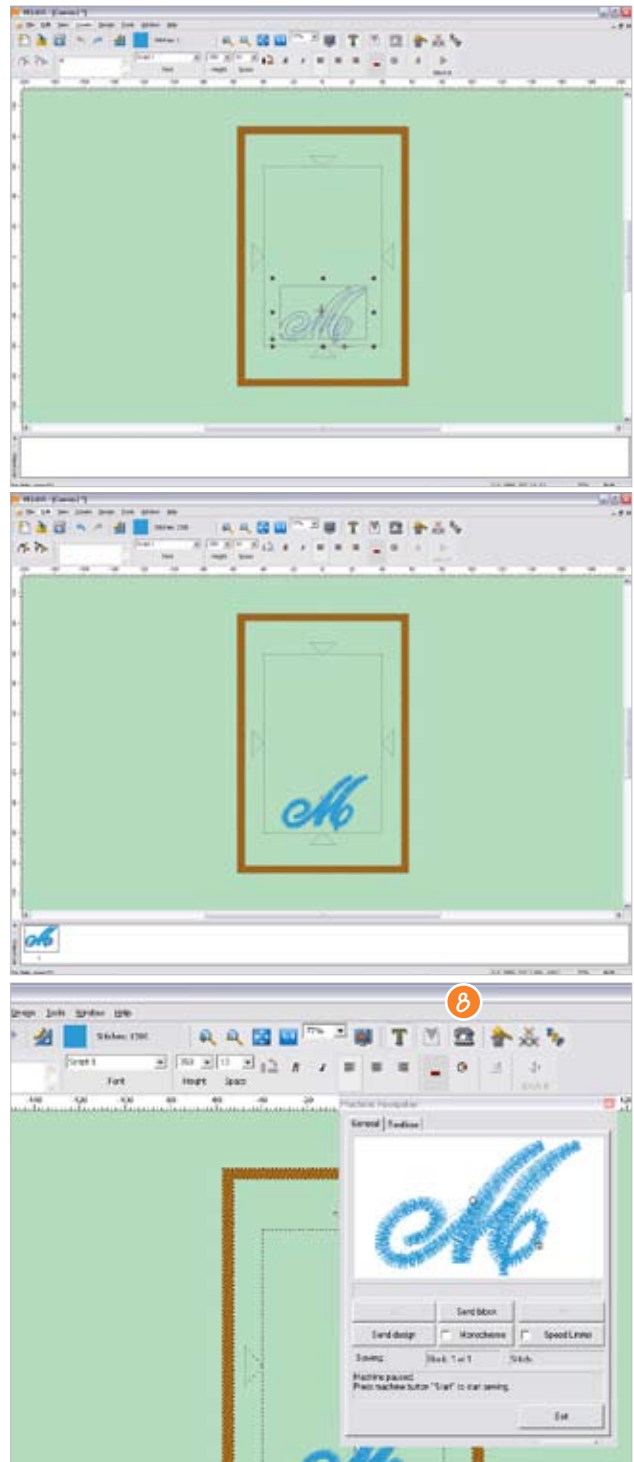

1. Select hoop size (sample was made using the “small” hoop).
2. Click on “T” to activate the text function.
3. Choose a font for the monogram (we used “Script 1”).
4. Enter your monogram letter (we used the letter “M”).
5. Select font size (we used “350”).

6. Position the embroidery in the hoop as desired (we placed the embroidery in the center bottom of the hoop).

7. Click outside the selection to create an embroidery of the monogram.

8. Click on the sewing machine icon to open a pop-up window with different send options. Click "Send design" to send the embroidery design to your machine.

Hoop the Towel

(For detailed hooping instructions and instructions on how to attach the hoop to the embroidery unit see your **H | CLASS™ 500E** Quick Start Guide or the User's Guide (page 43-44)).

Place Tear-Away Stabilizer on top of the outer hoop. Position the towel on top, with the corner of the towel pointing towards the lower center of the hoop (see illustration to the right).

Place the inner hoop on top and tighten the hoop screw.

Thread your machine with embroidery thread on top and embroidery bobbin thread in the bobbin.

Attach the hoop to the embroidery unit.

Embroider the monogram!

When finished, remove the fabric from the hoop and carefully tear away the stabilizer.
