- Inspira® Embroidery Needle, size 75
- Heavy Weight Water-Soluble Stabilizer
- Various red Rayon 40 wt embroidery thread
- Metallic thread

Embroidering on lightweight fabric

The deLuxe Stitch System™ improves the balance between needle thread and bobbin thread. Thanks to the deLuxe Stitch System™ you can now easily embroider with different kinds of threads in the same design. The deLuxe Stitch System™ gives a perfect result even on the reverse side of the fabric.

- Use an Inspira® embroidery needle, size 75
- Always test your embroidery on scraps of the actual fabric with the stabilizer and threads you will be using before starting your project.
- Hoop the fabric with heavy weight water soluble stabilizer underneath.
- When finished embroidering, cut away the excess stabilizer around the design. Rinse in lukewarm water or according to manufacturer's instructions.

Finishing the edge of the shawl

- Snap on the Utility Foot A. Select the zigzag stitch no. A1:11 and adjust the stitch width to 1.5 and the stitch length to 2.
- Fold 1/2" (1 cm) of the edge underneath the fabric and sew along the folded edge.
- Remove the excess fabric by cutting close to the stitch.
