4. Touch Start Menu to open Extended Tool Bar.

5. The Design Menu opens automatically.

6. Touch design DD_036.vp3

7. Touch Start Menu to open Extended Tool Bar. 
8. Touch Exclusive EMBROIDERY ADVISOR™ Menu 
9. Touch the Fabric you want to embroider. Choose Woven Medium. 
10. **Foot:** Indicates which foot to use 
11. **Needle:** Indicates what needle to use - Universal 80
12. **Stabilizer:** Indicates what stabilizer to use - Tear-A-Way hooped with fabric
13. **Embroidery Thread:** Indicates what kind of thread to use – 40 wt.
14. **Bobbin Thread:** Indicates what kind of bobbin thread to use – 60 wt./70/wt
15. Touch OK to close the EMBROIDERY ADVISOR™ Menu. 

DESIGNER™ Majestic Hoop

Be sure the area around your DESIGNER DIAMOND™ Sewing and Embroidery Machine is clear so the hoop will not hit the wall (or you!) while embroidering.

1. Fold a 22” square piece of fabric twice to find the center. Hoop with Tear-A-Way Stabilizer in the DESIGNER™ Majestic Hoop. Insert hoop clips following instructions included with the DESIGNER™ Majestic Hoop.
2. Slide on the DESIGNER™ Majestic Hoop.
3. Touch GO! to go to Embroidery Stitch-Out. 
4. A pop-up message will come up “Embroider all on one side before turning?”
5. A check mark in the “Yes” box is  displayed.

6. Touch OK to close pop-up message. 
7. *If you place the check mark in the “No” box, the embroidery will stop after each color change so that you can turn the hoop. This can be useful on a very heavily-stitched design that may distort the fabric as it is embroidering. By embroidering both sides as you go, the compensation will be the same on each side, assuring better results.*
8. Go to the SET menu, Sewing Settings. Select Automatic Jump Stitch Trim so a check mark appears in the box to turn it on.
9. Touch OK to return to Embroidery Stitch Out. 
10. Touch Start/Stop to begin embroidering. 
11. The first few stitches will be the alignment stitches in the center at one end of the hoop.
12. When one side of the design is complete, a pop-up message will appear. “Turn Hoop”
13. Remove the hoop and rotate the hoop 180°. Slide the hoop on.
14. Touch OK. The hoop will calibrate. 
15. Embroider the second half of the design.
