

## Autograms

Autograms--the combined stitches formed when the Husqvarna Viking patented Autogram feature combines design elements with an automatic "snap to join" feature. Autogram feature available only on Husqvarna Viking Designer I with software version 1.41.

The first Husqvarna Viking Embroidery Disk to utilize the Autogram Feature is Broderie Anglaise number 48. Note: there is a disk 48 for Husqvarna Viking #1+, Rose, Designer II but the designs must be combined manually.

Husqvarna Viking Designer I--with version 1.41

Slide on embroidery unit

Touch ok on Color Touch Screen to calibrate embroidery unit

Slide in Embroidery Disk 48, Broderie Anglaise--(please check spelling and number)

Select PROG (Built-in Color Customizing Screen will come up on Color Touch Screen)

Touch Menu (Main Menu will come up)

Touch the Disk on Main Menu

Select desired design menu (designs will come up on screen)

Select design (selected design will come up on Color Touch Screen)

Select hoop size (recommend Mega Hoop for long Autogram borders, etc.)

Use arrows to move design to top of hoop

Select Menu

Touch desired design (Design will come up on screen and "snap to join" design already on screen

Continue until Autogram design is complete and/or hoop is filled
