

# Deelybob™

## The Universal Thread Cone Adaptor

PATENT PENDING

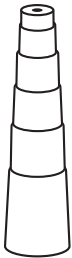

“Changing the Way You Use Thread”

**Deelybob™ Universal Thread Cone Adaptors** are handmade from specialty plastics in the United States. It works as a “ball bearing”, improving thread feed for all **cotton, rayon, polyester** and **metallic threads**. The Deelybob reduces wobbling cones, prevents tangles and produces a low, even line tension. It eliminates the need for a table-mounted thread holder by letting you put thread cones directly onto your sewing machine spindle!

Creates low even thread tension • Improves use of rayon and metallic threads  
Reduces tangled thread • Reduces wobbling • Saves time • Saves money!

### HOW TO USE

The original Deelybob is **for serger thread** and is available in one, four or five packs.

**TO USE:** Place Deelybob on spindle. If no spindle is available, mount on the bobbin spindle.

The Spacer **reduces friction for large cones** and is included in the complete Deelybob II kit.

The Quilting Bob is for **small to medium quilting threads**.

**TO USE:** Place the Quilting Bob (base only) on spindle or bobbin.

The Robison-Anton Adaptor is for **medium Robison-Anton threads**.

**TO USE:** Place the RA adaptor on spindle or bobbin.

The complete **Deelybob II** kit includes the original Deelybob, the Spacer, and the Quilting Bob base. It forms **the complete thread cone adaptor system**. (Robison-Anton Adaptor sold separately.)

#### TO USE:

Place the Base, Spacer and Deelybob on spindle or bobbin. Place thread cone on top of the Deelybob.
