

## Embellishing Denim – Worn Jeans

Embellish denim fabric with a decorative design or create the “worn denim” look that is so popular today. With this technique the needles punch into the denim only. There is no embellishment fabric or yarn added on top.

### YOU NEED:

- Dark blue denim jeans.
- Pictogram pen 412 08 38-48
- Printed flower template
- Paper scissors
- Seam ripper
- Husqvarna Viking® ER10™ Embellishing Machine
- Husqvarna Viking® sewing machine

### PAPER PATTERN

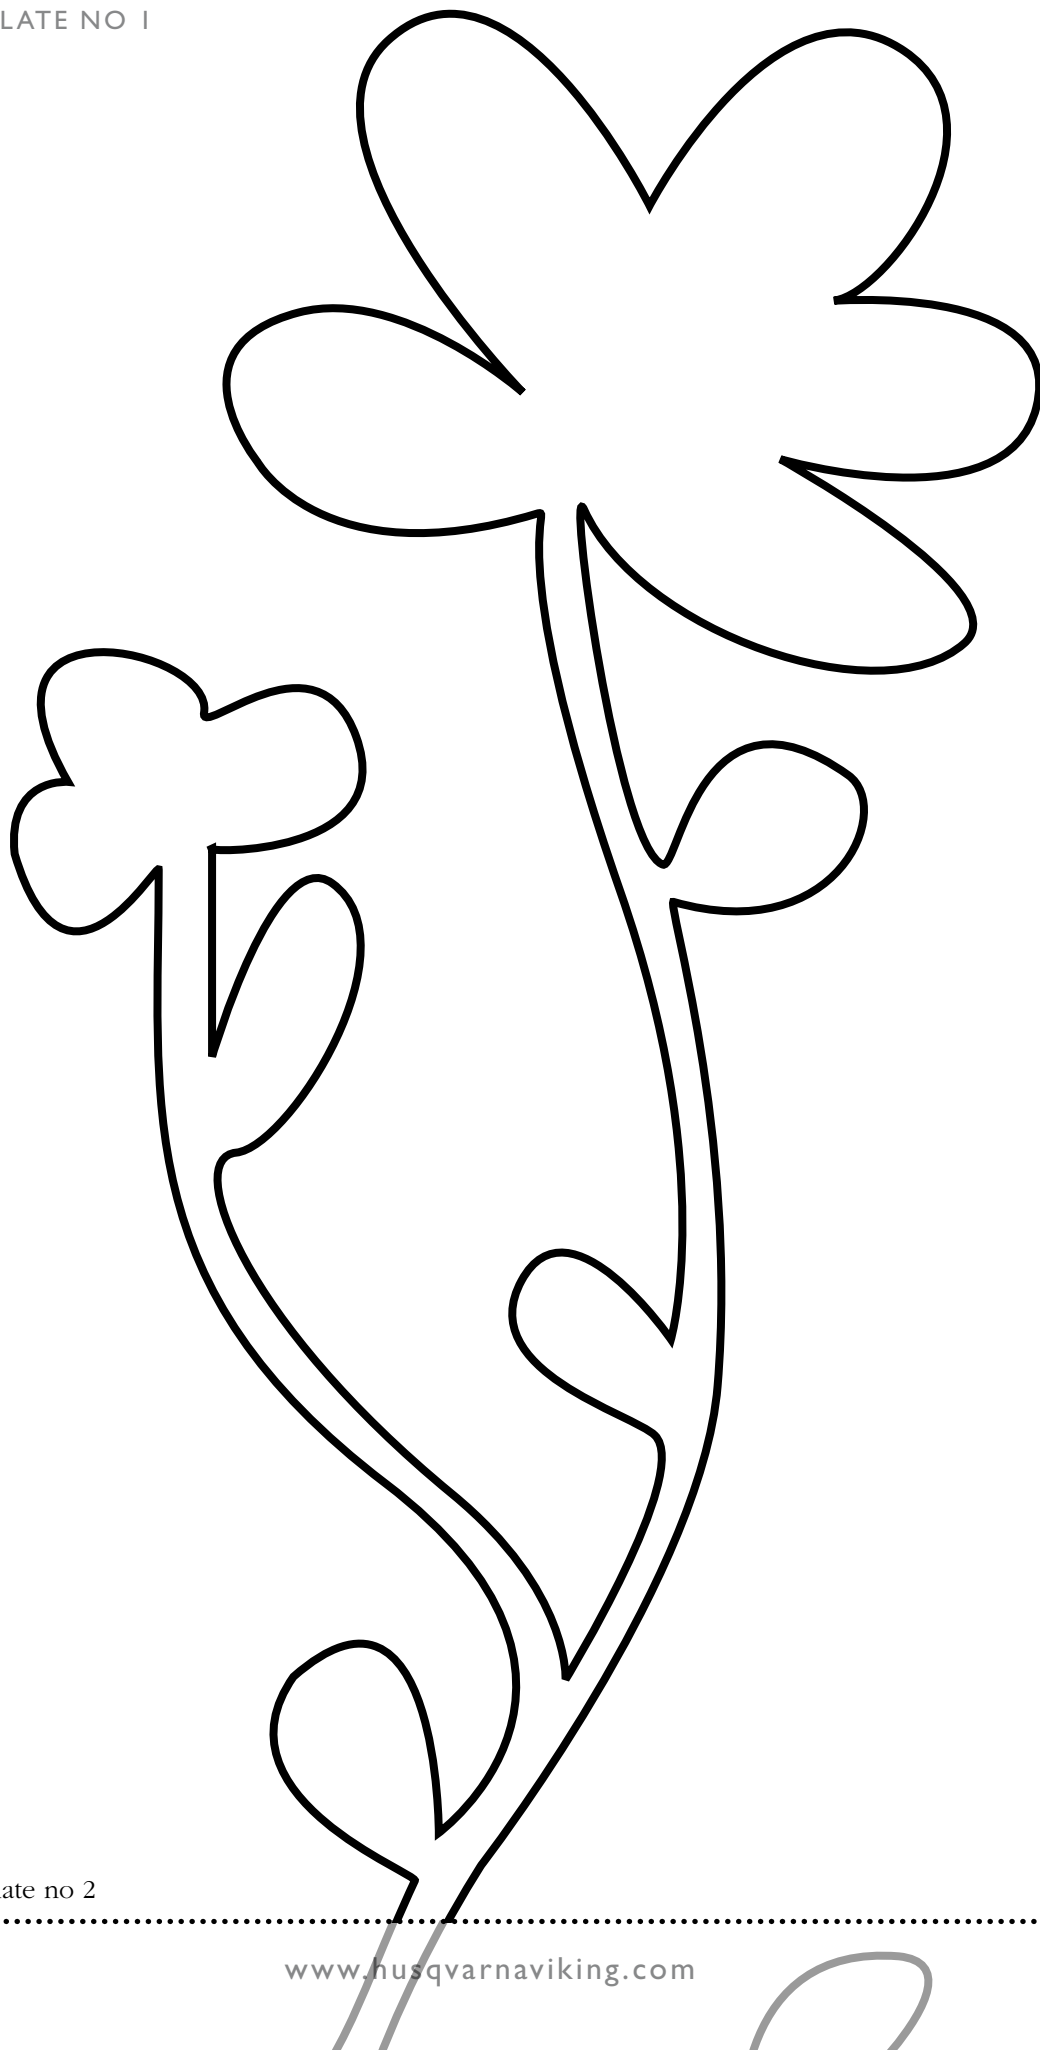

Cut out the flower pattern from the template (see following pages).

### PREPARE THE JEANS

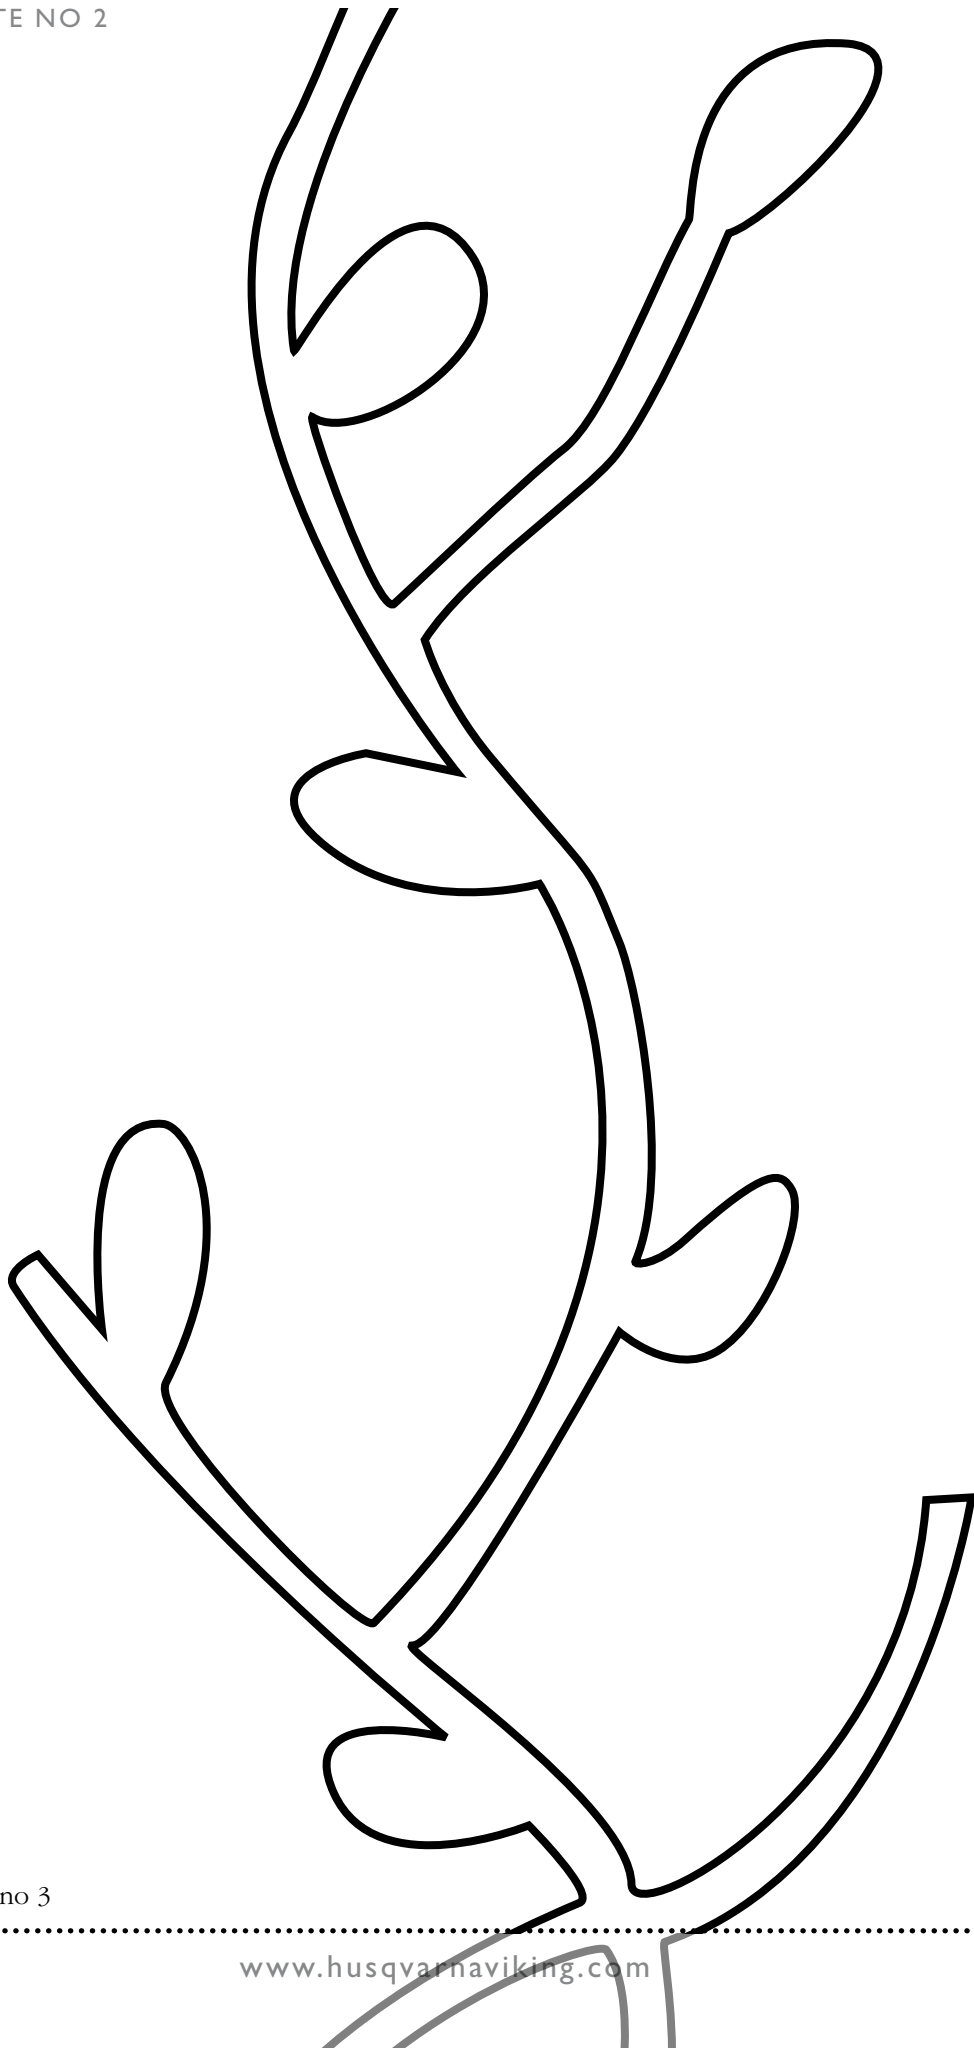

Select which leg you want to embellish. Open one of the side seams on the leg using a seam ripper. Trace the flower shape onto the wrong side of the jeans fabric using the Pictogram Pen.

### EMBELLISH/PUNCHING

- Start needle felting the flower design on the wrong side of the jeans and needle felt over the entire flower and stem area. The more needle felting/punching you do with the needles the more prominent your design will be.
- Look at the right side of the jeans often to check your results and determine where you need to do more needle felting to make the design more visible.
