

# Lampshade

*Update an old lampshade with a new cover made in cotton attached with velcro. The decorative bands are cut with pinking shears and stitched with straight stitch in all directions over the shade.*

## **Sewing Supplies**

*Cotton fabric, enough to cover selected lampshade*

*Sewing thread in matching color*

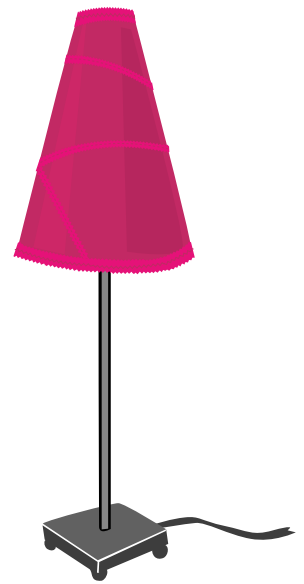

*Velcro (in the same length as the height of the lampshade).*

*Fusible interfacing*

*Trim or plastic coated fabric*

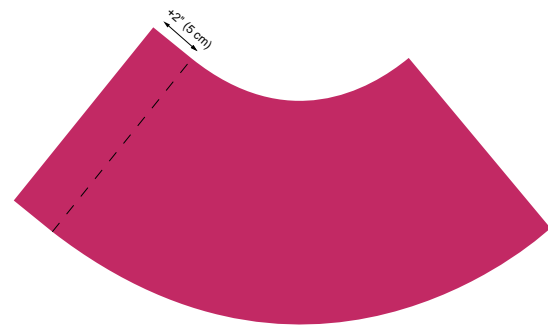

*Pinking Shears*

*To make a pattern of a lampshade that you wish to cover, fold pattern paper around it and secure with tape. Trace a pattern.*

## CUT

For trim, cut narrow strips of plastic coated fabric with a pinking shears. Cut out one lampshade piece in cotton and one in fusible interfacing according to the pattern. Add 2" (5 cm) on one of the sides as illustrated, to make the lampshade wide enough to overlap over the old one.

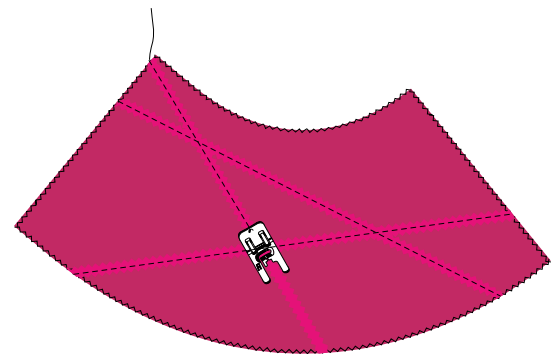

## SEW

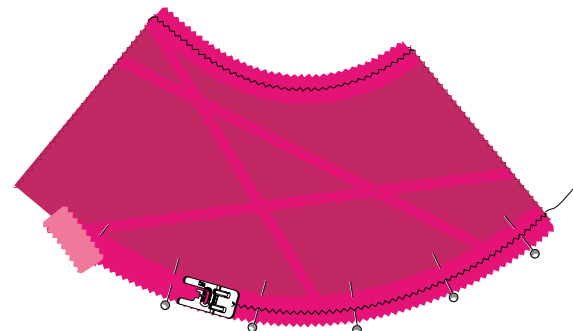

Press Fusible interfacing on the wrong side of the fabric piece to stabilize it.

Snap on presser foot J and overcast all edges.

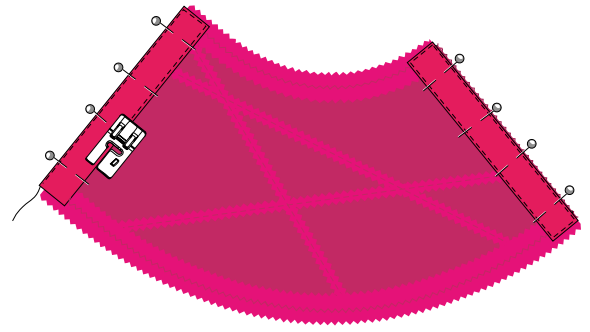

Select straight stitch, stitch length 2.5 and snap on presser foot A. Decorate the outside by sewing trim with straight stitch in all directions over the lampshade.

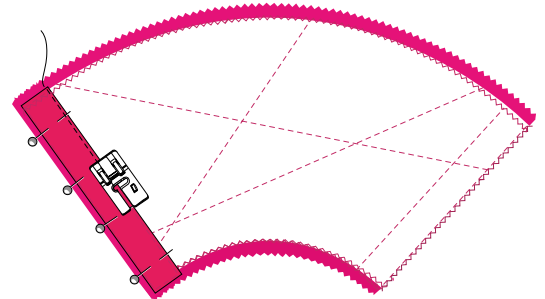

Cut a 2" (2 cm) wide zig zag band with the pinking shears to decorate the lower and upper edge of the lampshade. Place the band so the fabric edge is centered along the band. Set your sewing machine for zigzag, stitch width 3.0 and stitch the band from the right side to the edge as illustrated.

Take apart the hook and loop side of the velcro and place them on the right side of the lampshade along the short sides. Set your Husqvarna Viking sewing machine for straight stitch, stitch length 3.0. Snap on presser foot D. Adjust the needle to the left and stitch the velcro to the lampshade.

To be able to fasten the velcro over the lampshade, press the right velcro part 1" (2.5 cm) to the wrong side. Stitch in place.

Cover your old lampshade with your new one!
