

## Hoop Ease

The Hoop Ease is a fiber stabilizer with the center cut out so there is no stabilizer under the design area. Hoop it with the fabric when embroidering thin, slippery and lightweight fabrics such as silk, organza and chiffon where no stabilizer bulk is desired under the design. The Hoop Ease is available in four sizes for Standard, Midsize/Plus Hoop, Large Hoop and Mega Hoop.

1. Place the fabric on a flat surface with Hoop Ease on top, with or without water soluble stabilizer as topping and/or backing.

Note: We strongly suggest using a water soluble stabilizer as backing when using Hoop Ease in the Mega Hoop.

2. Place fabric and Hoop Ease on top of outer hoop and insert the inner hoop. Tighten the screw as needed so the Hoop Ease will hold the fabric on all sides and is visible within the hoop area with approximately 3/8" (1 cm) on all four sides.

3. Embroider the design.

The Husqvarna Viking Hoop Ease can be used a number of times and is available as an accessory when worn out so it no longer holds the fabric firmly in the hoop.

The Hoop Ease is available for all hoop sizes except the round spring hoops.
