

Felt, then Embroider, Embroider, then Felt???

That is the question, and it doesn't matter!

1. On your Huskystar ER10 Needle Felting Machine, felt a very thin layer of roving in approximately a 4" x 4" area.
2. On your Husqvarna Viking Sewing Machine, insert a size 90 Topstitch needle. Thread with Sulky 30 wt. Blendable thread on top and bobbin thread in the bobbin.

3. Hoop stabilizer in your 100 x 100 hoop. Baste the felted area to the stabilizer by touching FIX.
4. Embroider the design.

OR

5. Embroider the design first, and then felt a small circle or ball of roving in the center.
