

autodigitizing

Getting Started

The Getting Started lessons are designed to familiarize you with how the program operates, as well as how to use the different features within *autodigitizing*. These lessons are included in the *autodigitizing* version 4.0 manual. If you have questions regarding the different features used in the lessons please refer to the manual for assistance and additional information.

Please work your way through the lessons remembering to save the files as indicated. Some of the embroidery designs you create in earlier lessons are needed to complete later ones.

It is strongly recommended that you have a basic knowledge of your computer and how to open/save files and move about your computer.

When needed, you will be prompted in the lessons on when to use a right mouse click, at all other times use your left.

All instructions were written assuming that the *autodigitizing* program was installed to the C Drive. If during installation you directed it to a different location please look to that location for the programs artwork files.
