

autodigitizing

Getting Started

Opening and Closing the Program

Before opening the autodigitizing program, please ensure that the Dongle is attached to your computer.

There are many ways to open or close the autodigitizing program. The most popular methods are as follows:

Opening autodigitizing

1. On the Windows task bar, click the Start button in the lower left corner. Scroll up to Programs (All Programs for Windows XP) and then select autodigitizing from the list.

OR

2. If during installation you had answered yes to creating a shortcut to the application, double-click the shortcut icon located on your desktop.

Closing autodigitizing

1. Click the Close icon (X) in the upper right corner of the autodigitizing window.

OR

2. Select File then Exit.

Note: If you have a design on your working screen when you close the program you may be prompted to save any changes.
