

Meet Madison!

LIMITED EDITION HUSQVARNA VIKING **Madison**

LIMITED EDITION HUSQVARNA VIKING *Madison*

The Husqvarna Viking Madison is a limited edition, **user-friendly** and **affordable** sewing machine. It is designed, developed, and **quality built** in Huskvarna, Sweden. But you have to act now, Madison is only available for a **limited time**.

The Madison features the Husqvarna Viking technology **Perfectly Balanced Buttonholes (PBB)**, which means both columns of your buttonhole are sewn in the same direction. PBB ensures professional looking buttonholes every time! The Madison comes with a **snap on and off buttonhole presser foot** for making each buttonhole column the desired length.

Thanks to the **Total Quality Feed system**, the Madison sews smoothly on all types of fabric—from sheers to many layers of denim!

The machine features **15 different stitches**, including the popular utility stitches, decorative stitches, useful stretch stitches and the beautiful PBB buttonhole. Simply turn the dial to choose a stitch. The best width is set, and the best presser foot and stitch length are recommended for every stitch.

Adjustable presser foot pressure allows the Madison to sew evenly on all kinds of fabrics. There are 22 needle positions for perfect edge stitching, topstitching, understitching and quilting. The **stitch length and width are adjustable** as well.

The **accessory box** slides onto the free arm to create a larger flat bed sewing surface. A **jam-proof rotary hook system** ensures threads never jam or tangle.

Up front convenience means all threading and settings are right at your fingertips. Just drop the bobbin in place, trim the thread on the built-in thread cutter and the thread comes up automatically. The bobbin can be wound directly from the needle.

The **Electronic Speed Control** gives you full needle piercing power at every sewing speed.

Three conveniently placed **thread cutters** clip off sewing threads in an instant.
