

DESIGNER™ | Fabric Frame

Features & Benefits

COMPACT DESIGN

The Fabric Frame works similar to a large quilting hoop, letting you quilt one section at a time. Quilt as large as queen, king, and larger quilts - all on this space-saving 4½' (1.3716m) frame, using the zone-to-zone quilting method. This gives you the convenience and space saving of a sit-down quilter with the capabilities of a large stand up system.

SureTrack GLIDE SYSTEM

This professional smooth dual-wheel track system improves carriage motion and accuracy, giving you more control of fine, detailed stitching no matter what sewing machine you have on the carriage.

UNIQUE SQUARE FABRIC TENSION RAILS

The square rail design allows the fabric to be easily clamped and tensioned correctly while pulling the wrinkles out of the fabric creating a smooth and even fabric surface.

HORIZONTAL AND VERTICAL CARRIAGE LOCKS

These clamps lock the machine and carriage in either the vertical or horizontal position allowing you to sew perfectly straight lines, ideal for stitching in the ditch or basting layers together.

FABRIC RAIL CLAMPS

Provide effortless fabric attachment and allows you to easily manage the layers of fabric without pre-installing the fabric to the rails. The fabric clamps uniquely ratchet around the square fabric rails helping position and maintaining even fabric tension across the entire work surface.

FLOATS FABRIC ABOVE THE BACK RAIL

This allows the finished quilt or sewing project to move out of the way of the machines arm, keeping the full stitchable space available.

LEADER CLOTHS INCLUDED

A time-saving product to help you attach the fabric to your frame easily and accurately. Includes three king size cloth leaders printed with precise guide marks and pin lines.

DESIGNER™ | Fabric Frame Features & Benefits

UNIQUE CARRIAGE DESIGN

Gives full access to all the machines functions and top thread area.

ADJUSTABLE HANDLE BARS

These allow you to easily adjust the handles to the best sewing position and to move them out of the way when changing the needle or replacing the bobbin on the machine.

EASY-FIT PLACEMENT FOR THE SEWING MACHINE

The back rail can be easily removed allowing you to quickly and safely position or remove your sewing machine from the fabric frame.

RAIL STAYS AT A CONTINUOUS HEIGHT

This eliminates the need to raise or adjust the rails when the fabric is moved to a new position saving time and ensuring your quilt or sewing project will never drag on the base of the machine.

HEIGHT ADJUSTABLE LEGS

Adjustable legs allow the frame to be raised or lowered in one-inch increments from 30" to 42" (76 - 107cm) (Fabric Surface Height) allowing you to work in comfort while sitting or standing.

LEVELLING FEET

No matter what floor your frame is on, these feet are an easy way to make sure it's level and balanced, ensuring you don't have any drag or resistance while sewing.

MANUFACTURED WITH TUBE STEEL AND EXTRUDED ALUMINIUM

Make the frame strong yet lightweight and easy to move if needed.

FULLY WELDED SIDES

These not only increase frame strength but they also simplify assembly.

OPTIONAL ACCESSORIES:

DESIGNER™ FABRIC FRAME LIGHT

Enjoy a well-lit environment with the optional DESIGNER™ Fabric Frame Light (shown above). These true-color LED lights are specifically designed to enhance your DESIGNER™ Fabric Frame experience at any height. The DESIGNER™ Fabric Frame Light is also great for use over a cutting or sewing table making it a truly universal product. #920525096

DESIGNER™ FABRIC FRAME STITCH REGULATOR

When used with the DESIGNER™ Fabric Frame, the DESIGNER™ Fabric Frame Stitch Regulator can be used in two ways giving you full control over your machine and stitches. Use it in Stitch Regulation Mode for consistent even stitches or switch to Constant Speed Mode and use it to adjust the speed of a sewing machine with a simple push of a button. # 920524096
